DESCRIBED: *Shock waves, *Propagation, *Stresses, Mathematical analysis, Non-linear systems

1245651

An analysis is given of a problem of disturbance propagation in a medium with nonlinear stress-strain relations. Euler's representation for a solid medium is utilized. Treatment of the problem is similar to that used by Taylor, but contrary to the latter's approach, here the principal attention is paid to the theory of propagation of shock waves.
